Permit No. _____

APPLICATION FOR WETLAND DISTURBANCE PERMIT

THE FOLLOWING INFORMATION WILL BE NEEDED TO PROCESS YOUR PERMIT:

Applicant Name: _____

Address: _____

Tax Map#: _____

1. If not previously submitted to the Building Department or Planning Board, APPLICATION MUST BE ACCOMPANIED BY:

- a. A COMPLETE SET OF PLANS FOR LOT IMPROVEMENTS AND LOCATION MAP OF WETLANDS AS THEY EXIST IN THE FIELD OR AS SHOWN ON Federal or State Wetland Maps. The boundaries of a wetland, water body or watercourse shall be determined by field inspection and delineation by the Town-approved wetland consultant and subsequent survey and mapping by a New York State licensed land surveyor unless such mapping is waived by the approval authority.
- b. A copy of scaled plans showing all details of construction and related footprint of structure or limits of disturbance. Only detailed drawings will be accepted and may be required to be submitted by a licensed design professional upon review of the Code Official.
- c. Plot Plan Sheet provided must be filled out showing all sizes and setbacks of structure.

2. Description of the specific purpose, nature and scope of the activity proposed.

3. Overall Project Disturbance Area: _____

4. Amount of Wetland Disturbance: _____

5. Amount of Wetland Buffer Disturbance: _____

6. List Required State or Federal Wetland Permits:

***The Town may require additional information to arrive at a determination on the application consistent with the purposes of Chapter 110 of the Town Code. Additional information could include topographical and perimeter surveys, hydrological computations, engineering studies and other factual or scientific data and reports. In the case of applications In the case of applications affecting water retention capability, water flow or other drainage characteristics of any wetland, water body or watercourse, the approval authority may require the inclusion of a statement of the area of upstream and downstream watersheds, impact analysis and information as to rainfall intensity in the vicinity for not less than a ten-year return frequency, together with approximate runoff coefficients to determine the capacity and size of any channel sections, pipes or waterway openings, together with plans for necessary bridges, culverts, stormwater or pipe drains that, in the opinion of the approval authority, are needed to arrive at a proper determination on the application, consistent with the purposes of this article.
